User journey

by the Design Team of Accenture Interactive NL

Difficulty
Beginner

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \wp

1 Phases High-level steps your user needs to accomplish from start to finish	MOTIVATION	ENTER CLINICAL DATA	PREDICTION	OUTPUT
2 Steps Detailed actions your user has to perform	Gathering info regarding Clinical data	Sending Clinical data	Prediction based on clinical data and health records	Provide effective prediction for the customer.
3 Feelings What your user might be thinking and feeling at the moment	Excited to get best results	Happy to get a proper detection	Eager to get the accurate prediction	Satisfied
	Nevous(If I would have CKD)	Worried	Anxious	Not Satisfied
